

There are two loops to the trail at Redwood Hill Preserve.

## 1 The Beatrice Rosamond All-Access Trail

The trail extends from the parking lot, around the Trailside Learning Center, continuing to the overlook deck, and back around to the learning center. Total distance = .4 mi. Enjoy a stroll or a roll through the woods along this ADA-compliant trail. Four interpretive panels are stationed along the trail describe the Geology of the Indian River Lakes, the Birds that may be found at Redwood Hill Preserve, the Frontenac Arch, and the Invasive Plants of our area.

## 2 The Seven Oaks Trail

The Seven Oaks Trail begins near the far end of The Beatrice Rosamond Trail and passes by several very large White Oak trees. At one point this area was open pasture and these trees were likely used as shade trees for livestock. This explains why they are much older and larger than the surrounding woods.

Watch for wildlife along this section of trail! White-tailed deer, Ruffed Grouse, and Pileated Woodpeckers are common.

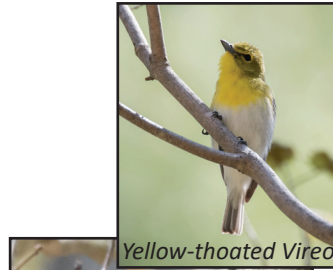

Large White Pine found along the trail

### Key

- Beatrice Rosamond trail loop - .4 mi.
- Seven Oaks Trail loop - .85 mi.
- Trailside Learning Center
- Interpretive panels
- Composting toilet
- Overlook deck
- State boat launch
